

# WHAT IS HALAL TO EAT? 1

# HALAL-MEAT ANIMALS

To consume any of these HALAL-MEAT animals, they should be slaughtered or hunted according to the Islamic law!

## TERRESTRIAL ANIMALS

**✓ HALAL**

- ALL DOMESTIC ANIMALS** All types of sheep, cows and camels  
Horses, mules & donkeys are deemed Makrooh or detestable
- SOME WILD ANIMALS** Antelopes, deer, cows, rams, roe deer and zebras

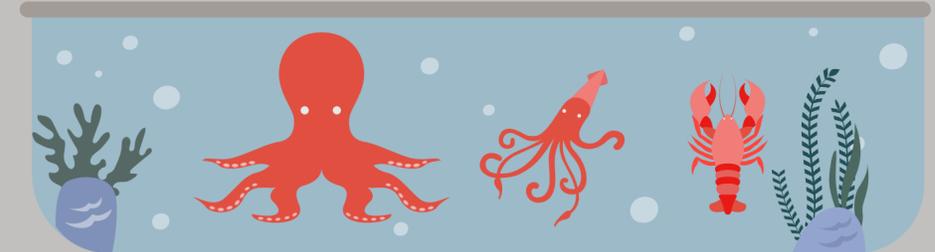

**✗ HARAM**

- ANIMALS WITH TUSKS AND PREDATORS WITH CLAWS** Such as walrus, boar, lions and foxes  
Dogs, pigs and cats, although considered pets in some cultures, are also Haram
- MUSUKH ANIMALS** Or literally "Transformed" animals such as monkeys, elephants, bears, rabbits and hares
- ALL SMALL ANIMALS THAT LIVE UNDERGROUND** Such as mice, snakes and hedgehogs

## AQUATIC ANIMALS

**✓ HALAL**

- All fish that have scales
- Only shrimps or prawns from non-fish animals

**✗ HARAM**

- Fish which originally don't have scales
- All non-fish sea animals (except shrimps) like octopuses, shellfish, crabs, etc.

## INSECTS

**✗ HARAM**

All kinds of insects are Haram, whether they fly such as butterflies and wasps or other kinds such as lice and worms.

**✓ HALAL**

The only exception in this group is Locusts

### Method 1

### IDENTIFY BIRDS OF PREY

### Method 2

FROM THE WAY THEY FLY!

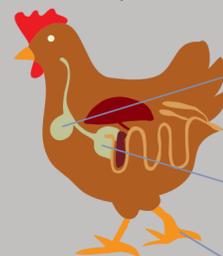

FROM HAVING A CROP, GIZZARD OR SPUR

If the bird glides in the sky more than it flaps its wings, it's a bird of prey and it's Haram to eat it

if it flaps its wings more than it glides in the sky, it's Halal to eat

If the bird has crop, gizzard or spur, it means it is Halal to eat it

**Crop** is a pouch in the gullet where food is temporarily stored

**Gizzard** is a part of the stomach where grits are stored

**Spur** is a horny spike on the back of the feet of the bird

If the results of these two methods contradict, the first method should be applied

## BIRDS

**✓ HALAL** Birds which have feathers and are NOT a bird of prey

**✗ HARAM**

- Those that have no feathers
- All birds of prey that have claws or talons
